Orangutech Partner Nintex Achieves Cloud Service Provider Protected B Status M/M at the Government of Canada

Ottawa, ON – Orangutech is proud to announce that its valued partner, Nintex, has been granted an Authority to Operate (ATO) for their Nintex Automation Cloud capability, Nintex DocGen solution, as well as their Nintex eSign solution. This formal Security Assessment & Authorization (SA&A) was conducted up to a Protected B Medium / Medium requirement by the Government of Canada. This milestone underscores Nintex's commitment to the highest standards of cloud security and its dedication to ensuring the confidentiality, integrity, and availability of information systems and related information in Canada.

Achieving a formal Authority to Operate approval up to Protected B Medium / Medium is a rigorous and comprehensive evaluation that assesses a cloud service provider's ability to safeguard Canadian Government data and uphold stringent security measures. Nintex's successful attainment of this certification reflects their excellence in security practices that bolster security controls, mitigates risk, and appropriately protects cloud-based Government of Canada services.

"Completing the security assessment and receiving an ATO for our next generation cloud automation platform is a huge achievement in our longstanding partnership with Orangutech and the Government of Canada." said Steve Witt, Director of Public Sector for Nintex.

This Authority to Operate positions Nintex as a trusted and reliable partner for Canadian Government departments by validating their ability to meet necessary cloud security requirements through enhanced security controls, policies, and procedures.

Nintex's achievement reflects the collective efforts of the entire team, who have worked diligently to implement and maintain robust cloud security measures. As a valued partner to the Canadian federal Government, this ATO not only enhances Nintex's credibility within the Government of Canada, but also reinforces the trust that Orangutech and other stakeholders place in the company's ability to handle sensitive cloud information and systems securely.

As Orangutech and Nintex continue their collaborative efforts, the Protected B Medium / Medium approval reinforces the commitment to delivering modern cloud-based solutions to the Government of Canada.

About Nintex

Nintex is the global standard for process intelligence and automation, powered by AI. Today more than 10,000 public and private sector organizations across 90 countries turn to the Nintex Process Platform to accelerate progress on their digital transformation journeys by quickly and easily managing, automating and optimizing business processes.
